

Manual Zimbra para Android

1- Ir a **GMAIL**, agregar otra cuenta, Otro

2- Poner tu correo usuario@paiporta.es

3- Seleccionar **Personal(IMAP)** y posteriormente poner la contraseña de tu cuenta

4- Ahora hay que poner **mailbox.paiporta.es** como servidor

a. Si al continuar sale que el certificado no es válido se dará en **Avanzado** y luego **proceder igualmente**

PROCEED ANYWAY

- 5- Ahora en el servidor de salida volvemos a poner el mismo servidor que antes **mailbox.païporta.es**

The screenshot shows the 'Outgoing server settings' screen in Gmail. At the top is the Gmail logo. Below it, the title 'Outgoing server settings' is centered. There are three main sections: 1. 'Require signin' with a toggle switch that is currently turned on. 2. 'Username' with a text field containing a redacted email address followed by '@païporta.es'. 3. 'Password' with a text field containing a redacted password, an eye icon to toggle visibility, and a close 'X' icon. At the bottom, 'SMTP server' is set to 'mailbox.païporta.es' in a rounded text field with a blue highlight and a blue dot below it.

- 6- Opciones de cuenta quitamos la opción de descargar archivos automáticamente por WIFI

The screenshot shows the 'Account options' screen in Gmail. At the top is the Gmail logo. Below it, the title 'Account options' is centered. There are three main sections: 1. 'Sync frequency' with a dropdown menu currently set to 'Every 15 minutes'. 2. 'Notify me when email arrives' with a checked checkbox. 3. 'Sync email for this account' with a checked checkbox. At the bottom, 'Automatically download attachments when connected to Wi-Fi' has an unchecked checkbox.
